

# GinsenoLite™-G

Vital energy

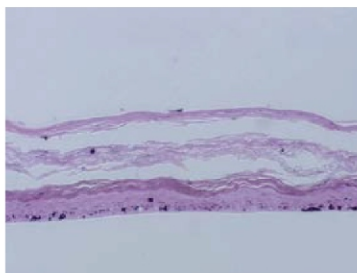

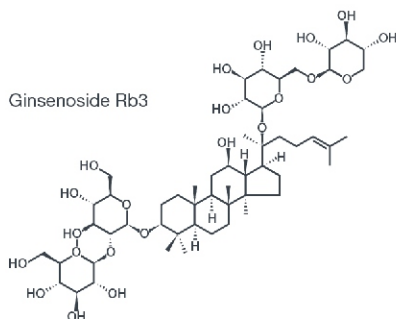

GinsenoLite™ is derived from Korean ginseng enriched the bioactive components ginsenosides. Ginsenosides possess a structure similar to that of plant polyphenols. GinsenoLite™ is standardized based on the content of the ginsenoside Rb3. GinsenoLite™ prevents skin melanocytes from producing and accumulating melanin pigments and was clinically shown to improve skin whitening.

## *In vitro* and clinical actions

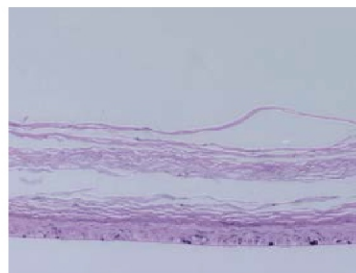

- Inhibition of tyrosinase activity (*oxidation of L-DOPA*)
- Inhibition of melanogenesis (*human melanocytes in culture*)
- Reduction of melanin pigmentation (*reconstructed epidermis*)
- No toxicity to skin cells
- Significant skin whitening after 28 days
- Excellent clinical safety profile

## Technical information

- Glycerin, Water, Panax ginseng root extract
- Panax ginseng fraction enriched in ginsenosides
- Preservative-free; water soluble
- Recommended use level: 1 -2%
- Applications:
  - Skin whitening/lightening
  - Even complexion
  - BB cream
  - Feminine intimate care
